

# UNDR.COM Printable Measuring Tape

FREE PRINTABLE TAPE  
FOR CAPTURING ALL  
YOUR MEASUREMENTS

You'll only need **scissors** and a **stapler** (and a few minutes of your time) to assemble this free printable **Tailors Measuring Tape** measuring almost 7 feet! Print this PDF onto a sheet of US Letter Sized Paper (8.5" x 11") at 100% with **no print scaling enabled**. Once printed, cut the measuring tape out **on the solid black lines**, being sure **to not cut the tape** into separate strips - you should end with a large S shape. Mountain fold on the dashed lines running horizontally, then valley fold on the vertical dashed lines, **allowing a half inch of overlap** with each turn, using the circles around the numbers for alignment. **Staple the folds flat** where noted.
